2012 hyundai sonata headlight

Seven problems related to headlights have been reported for the Hyundai Sonata. The most recently reported issues are listed below. Please also check out the statistics and reliability analysis of the Hyundai Sonata based on all problems reported for the Sonata. Airbag light does not go away. No accident. Headlight and brakelight burns out every months. First issue occurred in my job's parking lot ,as I tried to crank my car it made a roaring start and didn't want to stay on. Cut the car off, checked oil. Added 2 qts had mom drive to dealership per serviceman request. They changed my oil and informed my mom of an ongoing issue. Well get off headed home, on regular county road headlights flashed off and on alone with radio console. Pulled over lights stayed on, but I notice taillight that has been replaced multiple times over the last couple months was out again. Tried to replace it and the wire was hot and bulb wouldn't come out. So, I decided to wait till I get home. But now I'm waiting on the side of the road because my engine light is on. Both headlights on my Hyundai went out at the same time. It could have been much worse if I was on the road and they went out. This is quite expensive. It seems to me this is a safety issue. Was there a recall on this problem? I noticed it as my wife was pulling out of the garage. I don't know how long they were not working. While driving with high beams on when I signal a turn the headlights go out for a few seconds before turning back on. Very dangerous when initiating a turn on country roads with no street lights and deep ditches on all four corners. This is a recurring problem and not a one time incident. About 2 months ago I started to have a loud clunking sounds while I was driving at a high rate of speed on the highway. It sounded like a knocking and it is actually pretty loud. It affects the steering of the car and shakes the steering wheel to the point it is not comfortable to drive over 50 mph. In California, if I drive 50 on the highway I am going to get rammed off the road. I did a quick google search and come to find out I am not the only one with this issue. This issue needs to be recalled by Hyundai so that everyone can drive their cars safely. I feel that I am in danger driving my car and have recently had to consider renting a car just to travel for the holidays. I am too afraid of breaking down in the middle of no where or in the dark. Less serious but still an issue is the lighting assemblies in the car. Both the front headlight assemblies and the back taillight assemblies are so properly made that the plastic has literally melted the housing assembly for the bulb and they get stuck inside. Thankfully they did because when they got it out you can see where it is melted and how it was stuck. That is not ok! I need to be able to change the bulb when it goes out. Not to mention the huge risk of a fire by having a hot light bulb by a bunch of melting plastic. I mean really hyundai, my car hits its warranty expiration and all of a sudden you are trying to kill me!. The contact owns a owns a Hyundai Sonata. The contact stated that the headlights illuminated dimmer than normal and made it very difficult to drive at night. The vehicle was taken to the dealer, who stated that the headlights were performing up to standard and they could not alter the design. The manufacturer was made aware of the failure and offered no assistance. The vehicle was not repaired. The failure mileage was 3, and the current mileage was 13. The consumer also stated the vehicle shifted in a rough manner and a fender lining was replaced. The contact owns a Hyundai Sonata. The contact stated that while driving a night, the headlights were dim and she was unable to see the road clearly. The dealer advised the contact that the vehicle was operating as designed and offered to install new lighting at her expense. The manufacturer agreed with the dealer. No repairs were performed. The current mileage was The approximate failure mileage was It was noticed the first time car was driven at night. Head lights do not illuminate entire road except when in high position. Difficult to see road. Car Problems. Headlights problem 1. Headlights problem 2. Headlights problem 3. Headlights problem 4. Headlights problem 5. Headlights problem 6. Headlights problem 7. Other Exterior Lighting related problems of the Hyundai Sonata. Brake Light problems Brake Light problems. Tail Light Switch problems. Exterior Lighting problems. Turn Signal problems. Brake Light Switch problems. Hazard Flashing Warning Light Unit problems. Tail Light problems. If the headlights on your Hyundai Sonata are malfunctioning, they should be fixed immediately. Faulty headlights can obscure road vision and lead to car accidents and serious injury. Loose electrical connections, burned out bulbs and popped fuses create most headlight problems, and all three have a quick fix. Turn off the engine. Allow it to cool down before checking the connections. Open the hood. Lightly tug on the electrical connector at the rear of Sonata's headlamp assembly. If the connector comes out, securely plug it into the rear of the assembly. If the headlights are still malfunctioning, you may need to replace the bulb. Rotate both of the plastic covers counterclockwise to remove them. The larger cover contains the low-beam bulb and the smaller one contains the high-beam bulb. Disconnect the power cord from the bulb base at the back of the assembly. Push the bulb spring on the assembly to remove the light bulb. Pull the old bulb out and place the new bulb in. The low-beam lights use H7 bulbs. The high-beam lights use H1 bulbs. Reattach the bulb spring and reconnect the power cord. Refasten the plastic covers. If the headlights still malfunction, there

may be a problem with the headlight fuse. Locate the under-hood junction box on the driver's side of the vehicle, behind the engine. If the fuse is broken, you will need to replace it. A fuse is broken if the metal inside is no longer in one single piece. Use your index finger and thumb to remove the fuse. Replace it with a new 15A fuse. Replace the cover and close the hood. Daniel Valladares began his career as a medical writer in He has written patient education brochures for several pharmaceutical companies and has worked as an auto mechanic at Kim's Speedy Auto Service since Valladares holds a Bachelor of Arts in English from Rice University and is currently studying to become a personal trainer. Step 1 Turn off the engine. Step 2 Lightly tug on the electrical connector at the rear of Sonata's headlamp assembly. Step 3 Rotate both of the plastic covers counterclockwise to remove them. Step 4 Disconnect the power cord from the bulb base at the back of the assembly. Prev 1 Next. Sonar aka Spyder has long been the most popular brand of aftermarket custom lighting, and for good reason due to their large selection, striking designs, and affordability. Black Projector Head Lamps enhance your nighttime driving by taking the existing light put out by your light bulbs and projecting it over a wider area, resulting in increased field of vision. The strip of super white L. R8 Style Projector Headlights also boost your head lens total light output increasing visibility allowing you to respond faster to obstacles that might come into your path. Smoke Projector Head Lamps enhance your nighttime driving by taking the existing light put out by your light bulbs and projecting it over a wider area, resulting in increased field of vision. Though they are the biggest, there are other options available, especially if you are looking for rare and unique styles to replace your stock Sonata Head Lights. They often have more focused product lines, with specializations in certain rare applications as well as offering unique features. The Euro Crystal Head Lamps from these companies are great for keeping your Hyundai Sonata differentiated from the pack, since unlike the bigger brands, they have much smaller production runs and can be very hard to find. Though these TD JDM Black Hyundai Sonata Crystal Headlights do not carry the long warranties of bigger brands, their cost effectiveness can be made up in their often significantly lower prices, especially with a little elbow grease. As with all tail lens and head lamps even your OEM ones , putting a extra seal of silicone sealant available at any hardware or automotive part store along the seam of your Hyundai Sonata Crystal Head Lights virtually guarantees they will stay clean and new looking for the life of your Sonata. Chrome Projector Head Lamps enhance your nighttime driving by taking the existing light put out by your light bulbs and projecting it over a wider area, resulting in increased field of vision. JDM Black Projector Head Lamps enhance your nighttime driving by taking the existing light put out by your light bulbs and projecting it over a wider area, resulting in increased field of vision. Smoked Projector Head Lamps enhance your nighttime driving by taking the existing light put out by your light bulbs and projecting it over a wider area, resulting in increased field of vision. Hyundai Sonata KS LED Halo Projector headlights are popular upgrades for customers looking for an aggressive and dramatic upgrade from their stock head lights. In addition to their unique styling, they convert the headlamp beam into a projector beam by the use of a carefully engineered convex lens. The halos act as rings of light surrounding the headlight bulb areas accentuating and increasing the amount of light output. The halo wires are left unwired, allowing the user to decide if they want the halo to function as signal lights, parking lights, or to be operated independently of other light functions accomplished by splicing the wires into the appropriate locations. As a safety precaution, make sure that the car has had time to cool down properly before starting the installation process. Put the vehicle into park or make sure it is securely in gear. Make sure to have the ignition turned off and the keys removed. Be careful to avoid burns, especially when turning on or off the vehicles lighting. Be careful to avoid crushing or cutting the bulbs. Also make sure to not touch the bulbs with your fingers, as this will cause blotting. Fully examine the connection of the contact points, ports and the wires as faulty connections can cause lighting problems. Make certain that the end of the bulb does not come in contact with the interior light shield of the headlight when adjusting the bulb. Accept PayPal only. Ship to USA only.
