This took about a hour to fully install and program but we weren't exactly rushing through it. I was hoping I could try and program it to my OEM remote start button, but it didn't work. So pressing the lock button 3X and my Jeep Patriot now starts! Talk about bulky! I feel high class with a remote start! Great buy, highly recommend! I've had many ask me the range on this. Thats how far you'll have. One person found this helpful. This wiring harness lived up to its claims and was worth the price. The install was as described. Easy as pie. It was already programmed for the Jeep and if I had taken the time to CAREFULLY read the very decent directions and payed better attention during the dismantling of my I would have knocked out out in 15 minutes instead of The remote starter uses the Jeeps keyfob so you can only start it from at close proximity to the car. We are very happy with it. Her Jeep is warm before she loads the kids up and starts her day. Happy wife, happy life. Awesome kit. Extremely easy to install. Other reviews online mention having to cut parts but not so on my Patriot. My only issue was my fault. I didn't read the instructions completely first i didn't see in the beginning what and where the plugs went into the new module. It is noted in the programming section. My only knock would be to note at the beginning to not make those connections until the programming stage. Also the note to release the programing button when the light turns blue could have been clearer. The lights will continue to cycle as long as you hold the button. You just have to release it when it lands on the blue as a solid light. I wrote to tech support for clarification. I figured it out before they called back but their response time was actually very quick and the tech was very nice and friendly. Am going to look at this same kit for my 05 Escalade. Works very slick! Start to finish!!!! Bought it for Christmas for the wife. She went out tonight so it was perfect time to install it. I am serious 15 min install. And works perfectly!!! Uses existing factory key fob so no extra things on the key chain. BUY IT!!!! I messaged the manufacturer and asked if it is supposed to unlock the vehicle and they told me this is normal. I have high end remote starts in my other vehicles and they do not unlock on start up. Took 10 minutes to install. Came up online as advertised and works perfectly. Outstanding device. Perfect for my Jeep Patriot install was a breeze by looking up an install video on YouTube. Perfect for hot California summers and cold winters. Would recommend this for everyone! Kind of pointless. If I have to go outside and walk down the parking lot to use it i mite as well hop in and start it myself. Yes it went in easy. See all reviews. Top reviews from other countries. This product was effortless and a breeze to install. Great value and works exactly as described descent range A must have for those scorching hot days and those early 3am winter mornings when I'm having to go plow. Will be a life changer for me!! It was true plug and play. I used my laptop and followed the online video. Start to finish 1 hr. After 1 yr, still works great. My wife put it in Valet mode somehow, I emailed Advanced auto security on Sunday and they replied that day with instructions on how to get the remote start to activate again. I would highly recommend them for any remote starter kit! This is as easy to install as advertised and it was shipped very quickly. They even have a Youtube video walkthrough. Definitely safe to do business with this seller. One person found this helpful. I've been a mechanic for 20 years now and install over remote starters. This was by far the easiest one yet. I will never install one the old fashioned way again. It is truly plug n play. It doesn't take a pro to do this. Easy step by step instructions. Word great easy to install at a fraction on what a professional would charge. Just watch YouTube videos and you'll be done in no time. It does work with my vehicle but I paid the higher price for it because it was supposed to work with an app on my smartphone. When I called the company they then told me it doesn't work that way, that I would have to buy a different one. This product worked great for me. Good instructions. I do not have keyless entry, but the remote start works fine. Had my mechanic install it. Easiest ever. Was able to hook up to my current remote in the key.
