Td 15 module

Your question might be answered by sellers, manufacturers, or customers who bought this product. Please make sure that you are posting in the form of a question. Please enter a question. It s a powerful-yet-affordable module for the live stage and recording studio. Thanks to Behavior Modeling Technology, the response becomes much more precise and faster, and the ambience enhances the sounds more realistically all of which were difficult to realize with the previous sound module. Behavior Modeling TechnologyBeyond the physical modeling of instruments, Roland goes a step further by modeling the instrument s distinctive behavior and how it responds to the performer, resulting in natural, expressive sounds that evolve organically in realtime. Internal Songs and Song PlayerThe TD is equipped with realistic and powerful onboard backing songs and loop phrases, which are perfect for practicing as well as for the pure enjoyment of playing along. You can mix the balance of your drumming with the backing track, change the tempo of the song with the Speed Control, loop specific sections with A-B repeat, and take your practice sessions to a new level. Firstly, I fell in love with them the minute I played them because they are easier to play and my playing improved. I feel I'm a better drummer on them. Second, I absolutely love that the loud sound does not come from the heads I'm hitting, it allows me to hear the mix of the band better while preserving my own hearing. I love how small and compact they are allowing me to see and reach better. Physical reasons; I noticed my hands don't ache as much playing them. I don't know if I've got the onset of carpal tunnel or what but the bounce of the mesh and the rubber cymbals relieves the hand stress a bit. When I outstretch my arms quickly to hit a cymbal, I get a shooting pain up my arm so having everything as close as possible is advantageous. The ability to change sounds, which I don't do much, but it's still a cool feature. Roland hit a home run with these babies and I can't give them up. I hope that helps y'all understand where I'm coming from. Being able to reduce stage volume is a great thing. I don't know about you all, but I hate not being able to have a conversation over the band. People love live music, but they also want to enjoy the company they are with and these drums enable that much better. I like that fact that they're always in tune and always make the sounds of a high end drum set. No fussing around with tuning. You can tighten the heads for the bounce you want without affecting the tuning. They're great for the studio because they don't have any weird vibrations you have to hunt down. Thanks to Behavior Modeling Technology, the response becomes much more precise and faster, and the ambience enhances the sounds more realistically â€" all of which were difficult to realize with the previous sound module. The TD is equipped with realistic and powerful onboard backing songs and loop phrases, which are perfect for practicing as well as for the pure enjoyment of playing along. You can mix the balance of your drumming with the backing track, change the tempo of the song with the Speed Control, loop specific sections with A-B repeat, and take your

practice sessions to a new level. This is a convenient way to repeatedly record yourself practicing and evaluate your performance. Compact and reliable single-trigger pad that easily mounts to a drum tension rod or other rod-type mounts. Easy to install, the single-trigger RTH attaches securely to the metal rim of nearly any standard drum. Ideal for use on snare drums, the RTHR supports independent head and rim triggering for playing two different sounds from the same drum. Click [More info] 2. As the snare and floor tom, the TDKV equipped with the new PDX, a lightweight inch mesh head V-Pad with an advanced dual-trigger sensor, a metal rim hoop, a tensionable head, and a compact casing. For perfect positioning, the dual-mounting capability increases your setup versatility. Built tank-tough and ready to take a pounding, the mesh head V-Pad sports a cool black finish with chrome bracket. Used in conjunction with the TD sound module, the pad lets you play rimshots, and the sound will change naturally depending on the strength of your stroke. Great for fast setup and easy transport, the VH mounts on conventional hi-hat stands, and provides a similar playing feel to a two-piece hi-hat. With optimized weight-balance and sensitivity, the CYC for crash provides a natural swinging motion and accurate triggering for consistent crash performance, including choke control. As a ride cymbal, the CYR offers an enlarged bow area and a realistic playing feel, with accurate three-way triggering for edge, bow and bell. With new mechanics and a cloth-designed bass drum head, the KD-9 provides great feel, dynamic response, accurate triggering and solid playability even with using a double pedal. You can adjust the position of the cymbals and toms freely for the ideal ergonomic setup. Highly effective sound isolation foot designed to be used with a kick pad and hi-hat stand in a V-Drums set.
